Education

Fudan University	2020.09 - 2023.06
- Software engineering (Master)	
University of Shanghai for Science and Technology	2010.09 - 2014.06
- Medical image engineering (Bachelor)	

Working Experience

BesTV - Research and Development Department - Test Engineer	2017.11 -
<ul style="list-style-type: none">● Automation Testing <p>Develop & maintain automation testing project for testing BesTV android App by Appium and Python.</p> <ul style="list-style-type: none">- Implement reporting module to generate detailed testing reports in HTML format for each run and send reports via email and Wechat to testing team.- Design and implement automation testing scripts.- Deploy the project to server for regression test, and setup execution plan to monitor the production App status. <ul style="list-style-type: none">● Functional Testing <ul style="list-style-type: none">- Design and execute test cases for different projects/modules (video playing module, vip system etc.) to ensure the product quality- Interface testing: design and execute interface test cases using postman and other tools.- Performance testing: do load testing, stress testing and stability testing on high flow events such as UFC Fight.- Support ENG: Grab http request/response by fiddler, wireshark for data analysis, use adb command to cooperate with ENG for debugging.	
Wicrecend (onsite Microsoft) - Software/Support Engineer	2016.05 - 2017.11
<ul style="list-style-type: none">● Support Engineer <p>Work in Azure app service group, help azure users solve problems.</p> <ul style="list-style-type: none">- Resolve some configuration issues like custom domain binding , etc.- Help to debug dev issues like 404 error, 500 error, etc.- Provide advice on performance issues like slow response, etc. <ul style="list-style-type: none">● Software Development Engineer <p>CSS Data Dashboard Platform development and maintenance</p> <ul style="list-style-type: none">- Front-end feature developing, bug fixing and performance improving.- Analyze the API request/response to debug and locate data/logic issues in backend. <p>Related Technologies: .NET, JS, HTML, SQL</p>	
51job, Inc Software - Software Engineer	2015.11 - 2016.04
<ul style="list-style-type: none">- Data crawler project: develop and maintain web crawler for crawl competitor website data. <p>Resolved IP ban issue. The project provide thousands of data into our DB every day.</p>	

- Phone call recording tool: design and develop, through the vendor's JS interface, a Web version call recording tool, which is used by sales department.

- CRM system feature developing and maintenance.

Related Technologies: Asp.net, SQL, HTML / JS / JQuery

Shanghai Chuwa Software Co.,Ltd - Software Engineer

2014.10 - 2015.11

Overseas Registration Management System Developing

- Develop the UI component and implement the backend function (data CRUD)

- Regularly do black box testing on developed modules

Related Technologies: ExtJS, SQL, JQuery, Webservice

Project in School

Wechat Applet of Class Management System - FE Developer

2020.10 - 2021.01

DICOM file parsing and visualization - Thesis author

2013.11 - 2014.04

Skills

Technical: python, C++, SQL, HTML/JS, xml/json, postman, fiddler, wireshark

Certification: CET6, Computer Software Tester(JAVA 3level)

Self Assessment

Positive, Passionate, Team Spirit, Responsibility
